***B-Organic is on a mission to eliminate plastic and food waste -***

In 2018, **B-Organic** was founded because the owner Cathy DiPilato was sick of wasting food and at the same time wanted to contribute to the environment by eliminating plastic.

She discovered organic cotton helped preserve fruits and vegetables. As part of eliminated food waste, the designs on the bags organize a refrigerator so people will see what they have.

The organic cotton is certified by Global Organic Textile Standards (G.O.T.S.) and is from India. The bags are made and distributed in Worcester Massachusetts.

***All designs are printed with fruit juices & vegetable oils***

***B-Organic Bags are Sustainable, Reusable & Long Lasting***
