

Don't Trash It!

Answers to your questions about home recycling, composting, and beyond

Earth Week 2020

Earth day in a pandemic

Moment of silence for people impacted by the pandemic.

We hope you and your communities are staying healthy and hopeful. We will move through this pandemic eventually and there will be a new normal.

One thing we know is that the issue of global climate change will continue as one of the most pressing issues of our time and we all have a role to play.

Welcome & Zoom 101

1. Please write in the chat box your name, campus and role(s), and where you are calling-in from today:

Example:

Lisa Bjerke, GreenerU, Support in UMass Climate Action Plan, calling from Boston

2. If you can, please share your video to help each other engage
3. Be on mute when you are not speaking (hold the space tab/button to speak)

Agenda

- Welcome
- Introduction
- Break out and group discussion
- Report out and next steps
- Thank you!

Guidance

1. **Have fun** - take personal care so we can last for the long run
2. **Practice compassion** - we are in unprecedented times requiring grace and kindness
3. **Collective wisdom** - share your input and let others share theirs
4. **Assume good intent** - we have different background and experience that we can learn from.

Introduction

Pamela Beckvagni
*Management Coordinator,
Environmental and Sustainability Waste,
UMass Lowell*

Suzanne Wood, LEED AP
*Associate Director,
Sustainability and Campus Services,
UMass Medical School*

Mary Martin
*Resource Manager
E.L. Harvey*

Nicole Kelly,
*Program Assistant
UMass Lowell*

Lisa Bjerke
GreenerU

Goals with today's lunch and learn

By the end of this webinar we will have...

Option 1: Compost

- Followed organic matter from kitchen to chicken's back to soil
- Know how you can start your own compost and started tips

Option 2: Recycling

- An overview of current recycling system and how it works in MA
- Test what can be recycled and not
- Learned what what happens if we wish-cycle...

Two break out groups today

Option 1: Compost

- Followed organic matter from kitchen to chicken's back to soil
- Know how you can start your own compost and started tips

Option 2: Recycling

- An overview of current recycling system and how it works in MA
- Test what can be recycled and not
- Learned what what happens if we wish-cycle...

Remember:

- Everyone to have the opportunity to speak ones in the group
- Try to adhere to the core values in today's lunch and learn

Don't Throw It Away.... It Can Be Used in Some Other Way!

Learning About Home Composting

Today's hosts are presenting from
the University of Mass Lowell's
Office of Sustainability

Pamela Beckvagni,
Environmental and Sustainability
Waste Management Coordinator

Nicole Kelly
Sustainability Program Assistant

Wait, what can be recycled?

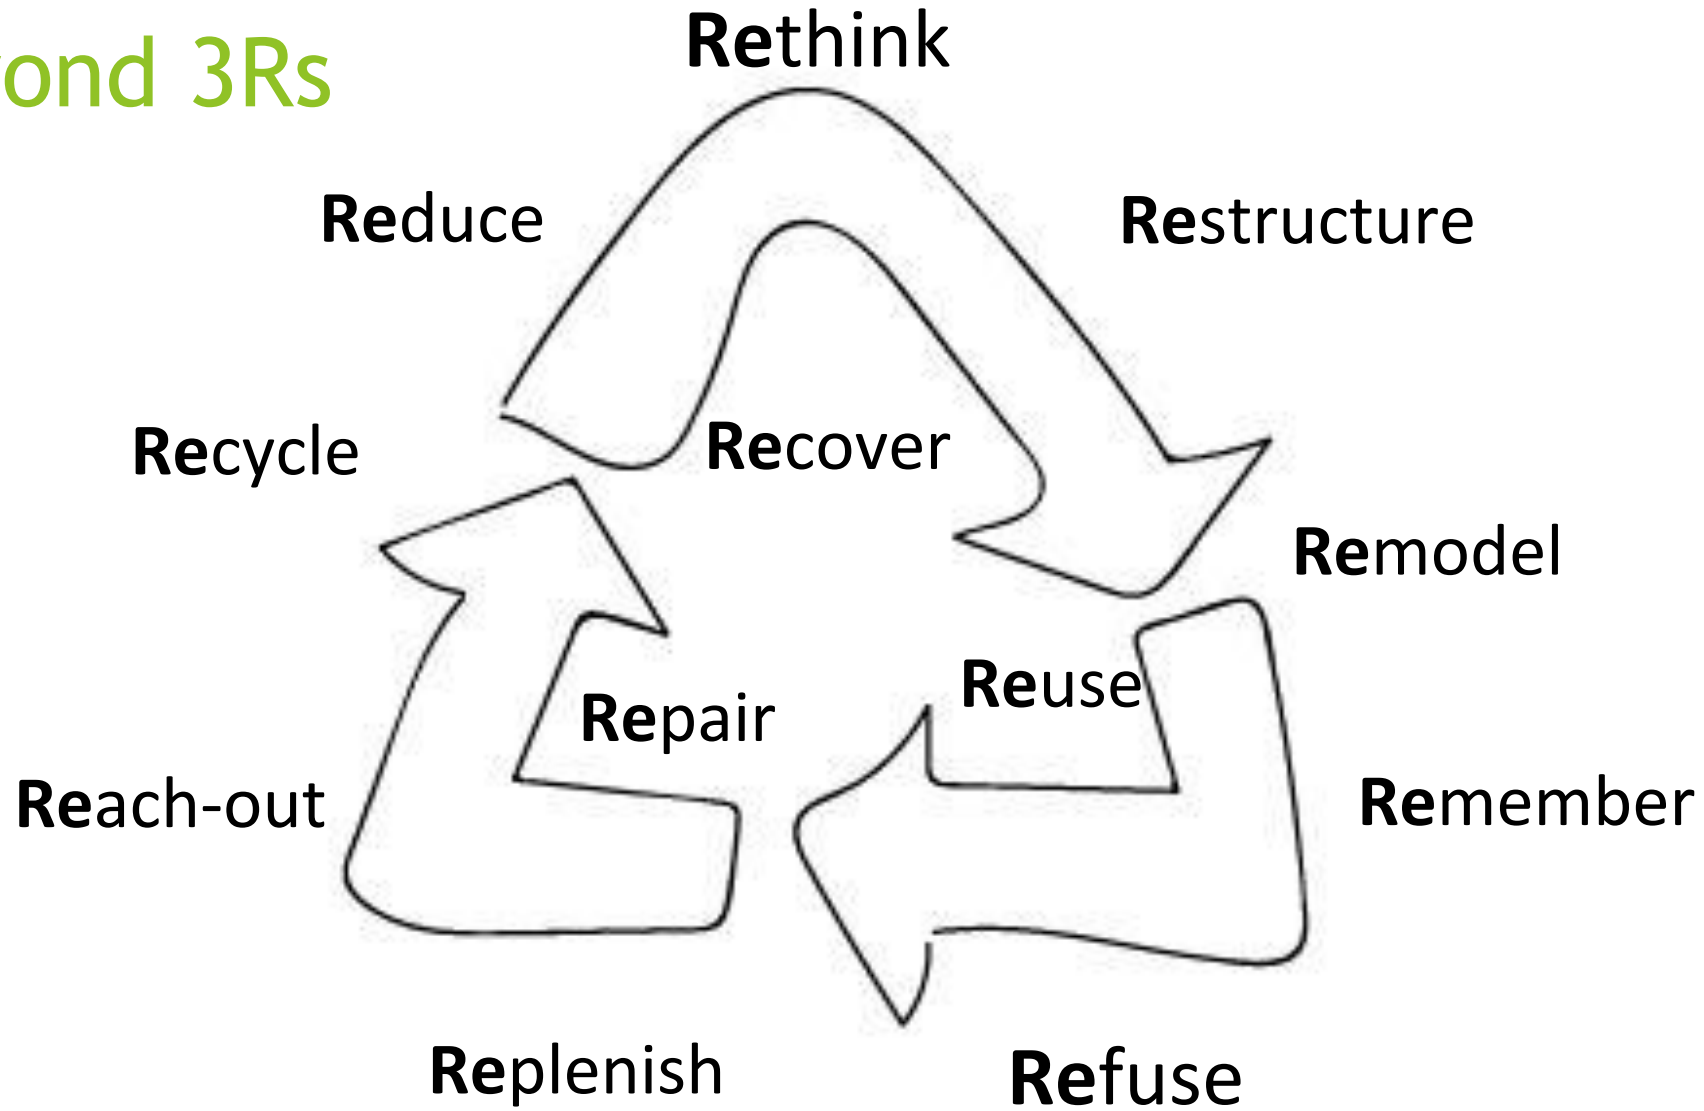

And, what happens with it?

- Where does your recycling go?
- Do's and Don't of Single Stream Recycling
- Why 'wishcycling' is harmful
- Ask the experts – can I recycle this?

Recycle
Smart

Beyond 3Rs

Welcome back & Sharing

- ▶ **Each group:** Share the three main takeaways from your group
- ▶ **Everyone:** Share in the comments field something you learned, an action you intend to take, or a questions you are holding.

Thank you!

Don't be a stranger!
