

# Saving information on oligos previously ordered through the MBCL IDT Portal

- Sign in to the portal and choose “Order History” from your account menu. It should look similar to this:

- Choose “COA download” from the Order Documents (the file format is .csv, which can be opened in text editors, Excel, LibreCalc, etc).

**Order information, yield, sequence, modifications, etc are all in .csv format. The reference# and manufacturing# will be sufficient to reorder the oligo in the previous format. Or you could copy/paste the sequence into a new order. From order history you can also download Spec sheets and QC information.**

**If you want this information, please download and save before April 30<sup>th</sup> 2026.**

**The portal data will not be transferred to new accounts on the IDT system.**

**If you need help please email [ellen.kittler@umassmed.edu](mailto:ellen.kittler@umassmed.edu)**
